

Reg. # Beef - 006

Shiga Co-operative Cattle Barn Fumio Honda (Ayabe City)

Environmentally-friendly resource recycling agriculture through Wagyu

Farm location

For the mother cows' bedding we use rice husks, a by-product of paddy rice, and for the calves we use rice straw.

We feed our cows with rice fodder and pasture grass that we produce here on our farm.

Certified 'eco-farmer' for paddy rice

What is 'Eco-farmer'?

'Eco-farmer' is...

a moniker for farmers certified by the governor for their plan of how to perform agriculture in an environmentally-friendly way, based on 'laws regarding promotion of the introduction of sustainable agricultural production methods'.

Gentle farming

1. Keeping the soil in good condition by using compost, etc...
2. Efforts to reduce the use of synthetic fertilizers
3. Efforts to reduce the use of synthetic pesticides
