

Reg. # Beef - 007

Tsuji Ranch (Kyotamba-cho)

Contributing to the area through the full use of rice paddies for the production of our own feed supply.

Farm location

We use grasses from around the rice paddies for feed, and also fertilize the rice paddies with cow manure.

We plant pasture grasses to use for feed.

**Our cows live comfortably,
with plenty of space for each
cow's feeding area.**

We are very particular ~

We are helping to enrich the soil through using grasses from around the rice paddies for feed, and also through fertilizing the rice paddies with cow manure. In doing this, we are working toward agriculture which recycles the resources of the local area, also pleasing our neighboring farmers.
