

Mori Livestock (Nantan City)

Reg. # Beef - 008

**Wagyu raised drinking the water of Tango,
eating the grasses of Tango,
and raised healthy and strong in Tango!**

Mori Livestock is located in the quiet Den-en region of Sonobe-cho in Nantan City.

**Set up with ducts and cheesecloth,
we can beat the summer heat! Even
in the summer the barn is cool!**

Our beds are fluffy and comfortable!

We maintain a stress-free environment for our cows. The cows live comfortably with plenty of space.

We feed our cows dried grasses which we break up into smaller pieces so that they're easier to eat. Our feed blend is carefully measured before being given to each cow, so we can check how much the cows have eaten.

The feed and the water are both delicious!

We raise our cows with the utmost care.

Popular among the local yakiniku restaurants!!

~Please give our delicious beef a try ~

Places to buy, and places to eat 'Kyo-no-Niku' ...

•Hirayama (Kyoto prefecture, Kameoka city, Chiyokawa-cho, Takanohayashi Nishida 6-8)
