## Helping local rice paddy farming with our use of rice straw

Farm location

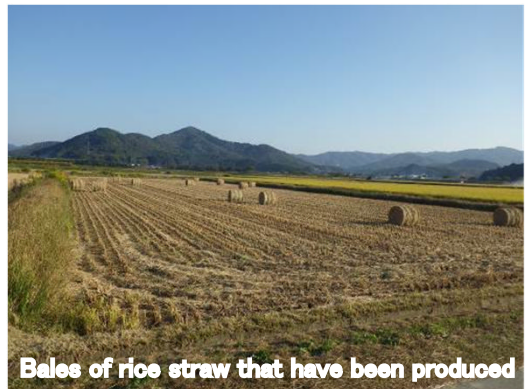

We are working toward the beautification and greenification of our cattle shed area by planting flowers.

The ceiling set up with cheesecloth

**We protect against the summer heat in the barn by using things like cheesecloth and electric fans!**

Bales of rice straw that have been produced

The rice straw we use in the barn is supplied to us by local farmers. The fluffy straw is nice for the calves to relax on (^\_^)♪
