

Reg. # Beef - 014

Apple Farm (Ltd.) (Yosano-cho)

Striving toward a farm that moves forward with the local community in the rhythms of nature

Farm location

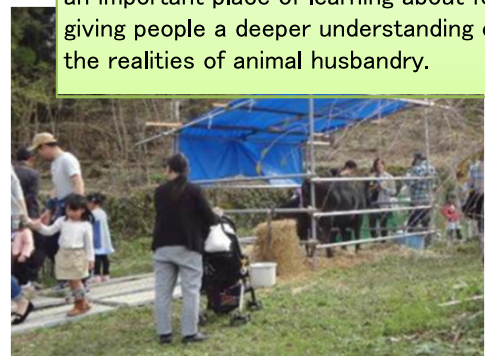

We make sure our calves get plenty of exercise out in the pasture so that they are good and strong for the shipping process.

A pasture of approx. 3,000m²

Through activities such as accepting visits from junior high schools, and exhibiting our new calves every year at our company event in November, we are an important place of learning about food, giving people a deeper understanding of the realities of animal husbandry.

We are offering to 'Yosano town gourmet' the Japanese Black cows which are no longer breeding as 'Yosano Beef' in an effort to revitalize the town. This is highly flavorful, high-quality meat. Our commerce and industry events can be found written about on Facebook!

The calves separate from their mothers once they can no longer pass through the fence. The timing for weaning ♪

We do our best to raise our calves with care along with the natural rhythm, having them live together with their mothers, so that they develop strong for shipping.

Brushing the cows clean.

A comfortable barn filled with rice husks galore!
