

Reg. # Beef - 020

Japan Sea Ranch Ikunouchi Farm (Kyotango City)

Making beef that's born and raised and even its feed grown in Kyoto prefecture!

Farm location

Rice for feed produced locally

We are rearing healthy cows in a comfortable environment, giving them plenty of locally grown and self-grown rice in their feed. With 'safe and secure' as our motto, over 80% of our coarse feed is grown locally within the prefecture.

We grind up our feed rice to increase its digestibility

We give our cows clean, sterilized water.

In the interest of food safety concerns, we have acquired the first 'Public Production Information JAS' certification in the prefecture and make our production history public. Also, we also make some 'Halal' options so that our muslim friends can enjoy our beef.

Eating lots of local, high-quality feed.

Tango Kingdom 'Shoku-no-Miyako' directly-run restaurant

~You can eat our beef here ~
