Grace Garden (Maizuru City)

Raising cows comfortably while making use of local abandoned crop fields as pastures!!

Farm location

We can relax in the barn and out on the pasture ♪

The mother cows we put out to pasture get just the right amount of exercise so they can give birth to healthy calves.

We are welcomed by local people to have our cows graze on the abandoned crop fields since it lightens the weeding work load and helps with environmental preservation.

We get brushings every day ♪

We manage day to day operations based on the 'Kyoto Wagyu Calf Feeding Management Manual'.
